

CM Adjustable frequency drive

Adjustable frequency drives offer a 40:1 speed range compared to a typical 3:1 range two-speed motors offer. Frequency drives allow controlled acceleration and deceleration, and with their programmable micro-positioning control and inching control, allow precise positioning eliminating plug-reversing or jogging.

Now available for factory or field installation on all CM hoists and trolleys.

For customer assistance or questions call 1-800-888-0985.
